# **ELITE IN STYLING. BEST IN SAFETY.**

A wide range of rear view mirrors.

**VERSATILE.**  
**PREMIUM.**  
**INNOVATIVE.**

**INTRODUCING  
OUR UNIQUE  
MIRRORS  
SYSTEMS**

Our comprehensive range is designed to elevate your vehicle's performance and longevity. With a foam element boasting higher dust holding capacity and extended service life, alongside dry cellular media for enhanced engine durability, our products ensure optimal engine health. Additionally, our viscous phenolic media reduces engine wear and tear, prolonging service life. Featuring pre-cleaner technology, our range offers superior dust holding capacity and further improves engine longevity, ensuring your vehicle operates at its best for longer durations.

## LOW REFLECTIVE- HANDLEBAR MIRROR

Premium aesthetics

Chrome-Plated, circular mirror

Optimum field of vision

### CUSTOM HANDLEBAR MIRROR

After the body, the most aesthetic part of a motorbike is the mirror. The design of the mirror and the way it is mounted on the vehicle can greatly enhance the appearance of the bike. Varroc has developed a custom handlebar mirror with a Nylon GF mirror housing and CED coating stay rod. The mirror, metallised with a chrome plate, is the epitome of style and utility.

### FEATURES

Nylon GF housing and CED-coated stay rod  
Adaptor + nut-type mounting mechanism  
Handlebar-mounted mirror assembly  
Lipless housing with support plate for minimal vibration.  
Certified by government bodies of Europe, India, US, China & Taiwan

### TECHNICAL SPECIFICATIONS

2-Wheeler mirror assembly  
Handlebar mirror assembly

## ALUMINIUM DIECASTED AND POWDER COATING MIRROR

Triangular rearview mirror on Slim Metal Stalks

Aesthetic design

Smooth articulation of mirror

### HANDLEBAR MIRROR FOR EV

This handlebar mirror was developed for the EV 2-wheeler an aluminium-die-casted housing and a powder-coated stay rod. With a lipless design and a support plate mechanism for pasting mirror, this mirror has an optimum field of vision.

### FEATURES

Aluminium-die-casted housing  
Powder-Coated stay rod  
Ball and Socket-Type swivelling mechanism  
Handlebar-Mounted mirror assembly  
Lipless design with a support plate for minimal vibration  
Certified by government bodies of Europe, India & US

### TECHNICAL SPECIFICATIONS

2-Wheeler mirror assembly  
Handlebar-Mounted mirror assembly

## ALUMINIUM DIECASTED & PAINTED MIRROR ASSEMBLY

High aesthetics painted housing

Ball joint type swivelling mechanism

### HANDLEBAR MIRROR ASSEMBLY

Crafted with precision, this mirror assembly features a painted or powder-coated die-casting housing, offering durability and aesthetic appeal for premium EV scooters.

### FEATURES

Aluminium die casted stay rod and housing with painting

Handlebar mounted mirror with ratchet mechanism

### TECHNICAL SPECIFICATIONS

Lipless design with support plate mechanism for pasting mirror

## ALUMINIUM DIE CASTED WITH PLASTIC HOUSING AND BLINKER

Integrated turn indicators for safety

Enhanced mirror aesthetics

### ALUMINIUM DIE CASTED MIRROR

Combining durability with functionality, this mirror features an aluminium die-casted construction with a plastic housing, integrating a blinker for added safety and convenience on the road.

### FEATURES

Aluminium Die casted stay with winker

Plastic housing with aerodynamic design

Fairing mounted mirror for premium segment bike

### TECHNICAL SPECIFICATIONS

Spring type mechanism for achieving required torque range

Powder coated stay rod

## CHROME - PLATED MIRROR

Mirror with enhanced aesthetics.

### CUSTOM HANDLEBAR MIRROR

Enhance your bike's style with this handlebar-mounted mirror, featuring a sleek chrome-coated finish for a classic look, complete with an integrated blinker for added visibility and safety.

### FEATURES

- Chrome Plated snap fit cover
- Handle-bar mounted mirror assembly

### TECHNICAL SPECIFICATIONS

- Lip type housing
- Slit type mechanism

## MIRROR ASSEMBLY WITH PLASTIC INSERT MOULDED STAY

Better visibility

Low reflectivity

### CUSTOM HANDLEBAR MIRROR

Designed to reduce glare, this fairing-mounted mirror offers low reflectivity, providing clear visibility and enhanced safety for riders in various lighting conditions.

### FEATURES

- Fairing Mounted Mirror
- Low Reflectivity Mirror

### TECHNICAL SPECIFICATIONS

- Lipless construction
- Aluminium Die casting stay
- Ratchet type mirror folding

## MIRROR ASSEMBLY WITH FORGED ALUMINIUM HOUSING AND STAY

Better visibility

Low reflectivity

### CUSTOM HANDLEBAR MIRROR

Featuring a bar-end design, this mirror assembly boasts a forged aluminium housing and stay for durability, paired with a low reflectivity mirror for clear visibility and enhanced safety on the road.

### FEATURES

- Bar end Mounted Mirror
- Low Reflectivity Mirror

### TECHNICAL SPECIFICATIONS

- Lipless construction
- Aluminium forging, anodised housing & stay

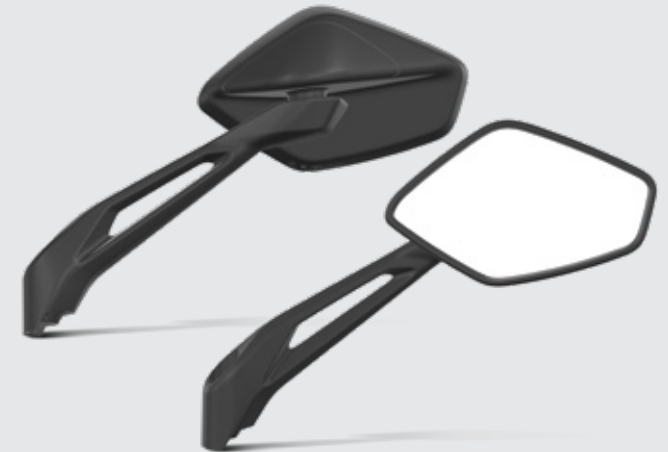

## HIGH VIBRATION RESISTANCE MIRROR

High vibration resistance due to use of high rigidity material

Can be used for premium segment bikes.

### CUSTOM HANDLEBAR MIRROR

Engineered for durability, this mirror assembly features a die-casted stay and a plastic housing made of Polyaryl amide GF 50% for increased rigidity. With high vibration resistance, it ensures clear visibility and stability, even on rough roads.

### FEATURES

- Die Casted Stay
- Plastic housing made of Polyaryl amide GF 50% to have more rigidity.
- High vibration resistance mirror assembly

### TECHNICAL SPECIFICATIONS

- Lipless construction
- Aluminium casted stay
- Spring type mechanism for achieving required torque range

# CAPABILITIES

---

Premium aesthetics

Wider, clear vision

Smooth articulation

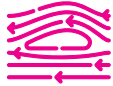

BAR end, handle mounted & fairing mounted mirror

Integrated mirror with blinker

Anti Dazzle Glass

Aerodynamic polymer shell

Billet aluminium body

AIS001, ECE-81, CCC, dot, VLCC Certified
